COLOR FLAME DYES

CAUTION

Thank-you for purchasing LuminEssence© Flame Dyes by Tribal Neon, the exciting COLORED FLAME product from Home of Poi.

As this product is still new, we want to ensure you are aware that this product **is not for use with** the following:

- fire heads that have been used with hydrocarbon based fuels such as white spirits, Coleman fluid, kerosene, Pegasol, lamp oils etc.
- fire heads that have been used with different colored flame dyes (e.g. Emerald Green head then dunked in Ruby Red fuel).
- fire heads that contain glues or other chemical residues.

For best results, start with a new fire head for each color and thereafter only use that fire head for that same colour fuel.

SAFETY

For those who have never used alcohol based fuels before, be aware it tends to burn a **lot hotter** than normal fire twirling fuels. Extra care needs to be taken in relation to personal safety AND to prompt extinguishing of your fire heads at the completion of the burn. This prevents smoldering which reduces the life of your wicks.

Please read the enclosed information leaflet THOROUGHLY before use. We hope you enjoy your colored flame experience and for more info contact us at: support@homeofpoi.com.
