

Congratulations On Your New Starlight Hoop!

The Starlight hoop is like no other. 40 psychedelic patterns designed to create mesmerizing effects when the hoop is in motion. Easily customize the color and speed of each pattern using the remote and save them to the favorites bank. It's the perfect hoop for long flow jams, performances, and festival use!

Uncoiling Your New Hoop

Your hoop has been coiled for shipment. For best results, remove the blue tape and allow the tubing to “breathe” for a day or two before connecting. If you're excited to get hooping, connecting it right away is okay too, but your hoop may be a little oval shaped at first.

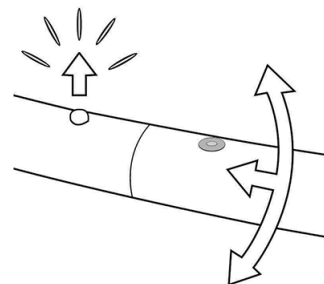

The best way to round out your hoop is by hooping with it. Laying the hoop on a flat surface in sunlight can help speed up this process.

We recommend storing your hoop connected to maintain its circular shape. If you collapse the hoop for travel, it's best to uncollapse it as soon as possible. The longer the hoop is collapsed, the longer it will take to round back out.

Connecting The Hoop

When connecting the hoop together, make sure the push button snaps into position. Slightly twisting the two ends of the tubing back and forth can help the button snap in.

Need more Help?

We're here to answer any questions you may have about your new hoop. We can be contacted by emailing support@astralhoops.com or by phone at 720-460-3396.

Need a different size or something not just right? Purchases can be returned for up to 30 days, or exchanged up to 60 days.
